

Paul Baeza

Project Manager - Software Architect - Software Developer

About Me

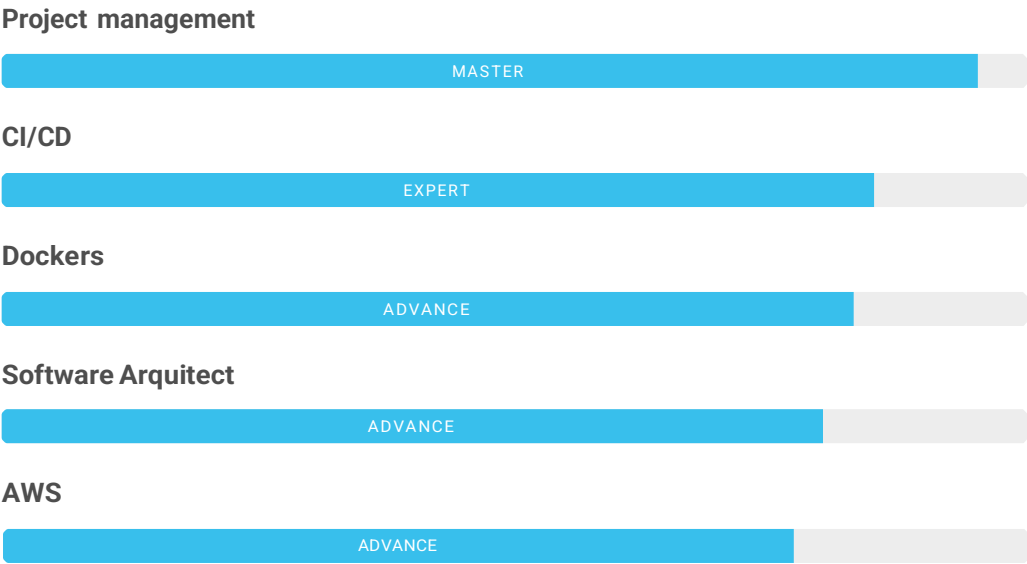

As a Chilean professional, I have more than 6 years of experience in leadership roles as a **Project Manager, Architect and Software Developer**, in addition to being available for relocation if required. Throughout my career, I have acquired solid experience in managing projects aimed at various markets. In my role as an architect and developer, I have stood out for my ability in the integration of payment devices and in the development of native applications for different POS, collaborating with leading companies such as NewLand, Rakinda and Topwise. Likewise, I have contributed to the successful implementation of CI/CD and the effective application of agile methodologies, such as Scrum and XP. My experience also includes the successful execution of implementations on AWS architectures.

Additionally, over time, I have nurtured a growing interest in developing mobile applications independently as a freelancer.

Professional Skills

Work Experience

- Project Manager** at Adexus

Oct, 2022 - Present

Currently, my focus is on managing projects linked to the dynamic banking market and renowned financial institutions. My strong commitment to collaboration and effective communication with our valued clients, along with my ability to understand and anticipate their needs, are fundamental pillars to achieve exceptional results in all the projects in which I play an active role.
- Mobile development** at Adexus

Feb ,2021 – September ,2022

Developer of various native mobile applications for Android with solid experience in Kotlin and Java. My knowledge covers the use of technologies such as Firebase to manage real-time databases and notifications. Additionally, I have outstanding skills in integrating Google services and APIs to enrich applications with advanced functionalities.

Backend Developer at Adexus

Nov, 2020 - Feb, 2021

As a backend developer, I have a versatile command of various programming languages, including Java, .NET, Python, C#, Kotlin, among others. My experience extends to using Docker, which has enabled me to deploy and manage development and production environments efficiently. This facilitates portability, scalability, and agile deployment of backend applications in a variety of environments.

Software architect at Success

Dic, 2020 - Oct, 2021

Architect and developer of applications specialized in payment methods and hospital management solutions, with a solid focus on the creation and optimization of computer systems designed to guarantee safe and efficient transactions in the payment sector, as well as to improve administration and care in the hospital environment.

Software architect at Axonia

Sep, 2019 - Oct, 2020

I led the complete architecture and development process of a specialized mobile application, designed to manage prepaid cards on behalf of the Cencosud company. My approach included the use of cutting-edge technologies, where we implemented Swift and Kotlin for the creation of mobile applications, which guaranteed an exceptional user experience. Additionally, we incorporated C# into the development of microservices, allowing for seamless and efficient integration with existing infrastructure. This project not only demonstrated my ability to lead advanced technical solutions, but also my commitment to meeting our clients' objectives in an outstanding manner.

Education

Aws well-architected Amazon Certification

2020

The "AWS Well-Architected" certification validates a professional's understanding and skills in creating effective, secure, efficient, and reliable solution architectures on Amazon Web Services (AWS).

Software Developer and data analyst Duoc Uc

2017

Professional in charge of analyzing, designing, developing and maintaining computer software and systems. My role involves understanding the needs and requirements of users or clients, translating them into technical specifications, writing programming code, debugging and testing applications, as well as collaborating in the resolution of technical problems.

Daniel Castro

Assistant manager of means of payment / Adexus

“ It is an honor for me to work alongside Paul, who has been an invaluable asset to our company during his time working with us. Paul is an exceptionally talented and dedicated individual who has proven to be instrumental in numerous critical projects for our organization. His ability to approach complex challenges with creativity and resolve has had a significant impact on the success of our projects. Not only are you an expert in your field, but you also possess an innate ability to collaborate effectively with your team and maintain a positive and productive work environment.

Daniel Cortez

Senior head of development department / Adexus

“ I have the honor of working with Paul, who is a person very committed to computer activities, projects and developments within the area, very clearly understanding the business objectives and the expected timelines for what he expects. I must highlight the management, collaboration and contribution capacity that it provides to both its internal clients and external clients. Likewise, I highlight his good project management and active listening to our clients. Paul is a very cooperative person and organizes very well within the team, being a direct backup

In short, Paul is an exceptional person who has contributed significantly to the success of our company. Any organization would be fortunate to have his experience and dedication.

Daniela Martel

Marketing Leader - Payment Media Management | Adexus

“ I have been working with Paul for three years, and I highlight his great analytical, proactive power and high knowledge in the development of technological solutions. In addition, he has excellent relationship skills at all levels that allow him to work with teams efficiently and effectively, and carry out large projects.

and support to the management in whom he fully trusts. In terms of software developer, you like cutting-edge computer languages and if you need to use one that is not in your dictionary, it does not take long to learn about new technologies.

Rodrigo Castro

DBA development department | Adexus

“ I have the pleasure of working with Paul for a period spanning over five years. During this time, we have shared many experiences working side by side on numerous projects. Working with Paul is like having a solid pillar that provides a feeling of peace of mind, since you know that you can always count on his support in the moments when you need it most.
